BASICONLINE.COM

Easy to learn and use

BASIC Payroll Plus software makes the most of technological advances helping you automate more of your day-to-day processes. The setup is simple and the intuitive software is designed to be easy to use but also to ensure efficient and accurate payroll. With a few different payroll plans, you can choose the option that meets your needs without requiring you to change the way you work.

Flexibility

With BASIC Payroll Plus you can receive all the benefits of outsourcing but still maintain control of your data. Take advantage of the over 150 different reports built into the system or use the report writer to design your own customized reports. We want your company to grow as much as you do, that is why our payroll system is designed to scale with the growth of your company. Our virtually paperless system offers unlimited options including: unlimited earnings, deductions, shifts, direct deposits, pay rates, localities, and more.

- Evolution HR – includes tracking and reporting on vital information
- Employee Self-Service – employees can access personal data, pay information, W2s and time-off accrual information
- WebClient – build or expand your web presence with a state-of-the-art internet payroll application

Security

BASIC Payroll Plus utilizes bank-level encryptions making it the most secure system available; much more secure than industry standard payroll service security. Our payroll system sends only updated information each time, not the entire company database, significantly lowering the chances of the wrong person getting the information they want. The system is completely auditable giving you access to historical audit trails by user.

Personal Payroll Guidance

We know processing payroll is not unique and that a problem with a paycheck can easily ruin someone's day. That is why BASIC's service is unmatched. Our customers depend on individualized attention and quick responses to special requests, and we deliver. Along with our payroll service, we offer direct contact with our customer service representatives who are readily available to answer any questions that may arise.
